## ORE DEPOSITS OF NEW MEXICO.

### A New Government Report.

Mining in New Mexico was probably begun in a small way centuries ago by the Indians, for the early Spanish explorers found a few trinkets of gold, silver, and turquoise in the possession of the natives. No true mining in the modern sense, however, except, possibly, the mining of turquoise, was done in this region until the nineteenth century. The copper mines at Santa Rita have been worked almost continuously for more than a hundred years, but systematic placer gold mining was begun at late as 1828, at the Old Placers in the Ortiz mountains, south of Santa Fe.

### An Era of Silver Mining.

The construction and operation of railroads through New Mexico in the late seventies and early eighties started an era of mining activity in the territory, in which the chief metal sought and produced was silver. During this era a group of mines at Silver City produced over \$3,000,000, and the mines at Lake Valley then and later yielded 5,000,000 ounces of silver. The silver output of the territory from 1882 to 1908 was about 35,000,000 fine ounces; the recorded production of gold from 1880 to 1908 was \$14,800,000.

### Copper, Zinc and Lead Mining.

At the beginning of the twentieth century the demand for copper, lead, and zinc mining in the territory soon to be a state is the United States geological survey's professional paper 68, entitled "The ore deposits of New Mexico," by Waldemar Lindgren, L. C. Graton, and C. H. Gordon, geologists. The report sketches the geology of the area and describes the known mineral deposits by counties and by mining districts. It covers 261 pages and contains 55 illustrations, including maps and geologic sections and several half-tone views.

This report is the first publication of the survey that deals comprehensively with the geology and ore deposits of a single state or territory. The accounts of the mining districts are necessarily brief but contain much detailed information, and the report not only provides a summary of the important facts concerning the ore deposits but includes discussions of the broad relations of the ores and of their origin. The work is likely to remain for many years a valuable reference book for all who are interested in the mineral resources of New Mexico.

### Report of the Geological Survey.

New Mexico still doubtless contains large undiscovered or undeveloped stores of mineral wealth and presents an inviting field to the prospector. The latest report on the ore deposits of the territory—soon to be a state—is the United States geological survey's professional paper 68, entitled "The ore deposits of New Mexico," by Waldemar Lindgren, L. C. Graton, and C. H. Gordon, geologists. The report sketches the geology of the area and describes the known mineral deposits by counties and by mining districts. It covers 261 pages and contains 55 illustrations, including maps and geologic sections and several half-tone views.

This report is the first publication of the survey that deals comprehensively with the geology and ore deposits of a single state or territory. The accounts of the mining districts are necessarily brief but contain much detailed information, and the report not only provides a summary of the important facts concerning the ore deposits but includes discussions of the broad relations of the ores and of their origin. The work is likely to remain for many years a valuable reference book for all who are interested in the mineral resources of New Mexico.

## About the State

Mr. and Mrs. William B. Rand informally observed their 50th wedding anniversary Monday at their home in Newtane.

Dr. C. S. Caverly, president of the state board of health, leaves this week for Europe, where he will study diseases. He will be accompanied by Mrs. Caverly.

Carl Ocasano, while working in a machine shop in Proctor Saturday, was hit in the eye by a piece of steel, which injured the eye so badly that it had to be removed.

The harvest of apples from Shelburne farms has begun. The crop is estimated at 5,000 barrels of marketable fruit, which is a fair crop for late years. The apples have already been sold to a New York firm.

Olin Merrill of Keosauqua Falls has recently given \$100 for the continuance of the permanent state road at Ramonville, which, when completed to the Berkshire line, will make an almost continuous stretch of state highway from East Berkshire to Keosauqua Falls, a distance of five miles.

The Ludlow woolen mills, which are owned by the estate of late late James S. Gill, have been placed in the hands of Conant & Co., of Boston, for sale. An inventory has been taken of machinery and fixtures and a survey made of the realty. The property will be widely advertised and sold at auction.

The West Rutland Water company has been obliged, owing to the scarcity of water in the reservoir, which furnishes the town water supply, to install a steam pump at one spring to furnish water. The pump is run only part of the time at present, but unless there is a heavy rainfall soon it will be kept up indefinitely.

Rutland county legislators are to take a good road. On September 27, the route being through southern Vermont, a corner of Massachusetts and into New York state. The trip will take two days and is under the auspices of the Rutland Improvement league. Money to cover all expenses will be provided by subscription. C. W. Gates of Franklin, state commissioner of highways, is expected to accompany the party.

Delegates from Vermont to the national council of Congregational churches, which meets in Boston October 10 to 20, are as follows: Rev. Henry L. Ballou, Chester; President M. H. Buckham, L. D. Burlington; Principal John M. Constock, Chelsea; Charles W. Gates, Franklin; Rev. Charles W. Osgood, Bellows Falls; Rev. Arthur P. Pratt, Bellows Falls; Rev. W. H. Spence, Rutland; Rev. D. H. Strong, East Brookfield.

Directors of the International Paper Co. at Bellows Falls are confident that the current fiscal year will show net profits for interest and dividends \$1,500,000 to \$1,800,000 larger than for the fiscal twelve months ended June 30. If realized, this would mean net profits of \$3,000,000 to \$3,300,000 and the latter figures would be close to the high record of 1901, when on \$20,711,000 of gross business, net profits of \$3,961,657 were obtained.

The fourth annual banquet of the Vermont Association of Local Fire Insurance Agents will be held at the Waterbury inn Thursday, October 13. The business meeting will be held at 5 o'clock in the afternoon and at 8 o'clock the banquet will be served. The guests of honor will be Dr. John A. Mead of Rutland, Secretary of State Guy W. Bailey of Essex Junction and C. M. Fletcher, former deputy insurance commissioner of Massachusetts.

Edward Pratt was severely injured Saturday afternoon, while tarring a roof in Bennington. The ladder on which he was working slipped from its place on the ridgepole, to which it was fastened, letting Mr. Pratt fall to the ground, twenty feet below. He landed on his left foot and the ladder struck him on the head. An examination showed that the bones of his left ankle were split and he has a long period of inactivity ahead of him.

The business of the firm of Rosier and Cottrell, manufacturers of shirt waists, in Bennington, has been absorbed by the firm of Bottum and Torrance of the same place and the plant and machinery will be moved at once to the collar factory of the latter. By the consolidation, Messrs. H. C. Rosier and George Cottrell become stockholders in the Bottum and Torrance company and both will be associated actively. Mr. Rosier will be manager and Mr. Cottrell superintendent of the shirt waist department. In early spring, an addition will be built to the factory.

The state board of optometry will hold its fall examinations at the Brooks house in Brattleboro, November 16, 17 and 18. It is thought that the legislature this fall will attempt to pass a law permitting medical practitioners to pass an examination in elementary subjects in optometry, which the optometrists in the state will oppose, on the ground that it is aimed at their profession. They think physicians in the small towns would take advantage of the law and practice optometry without taking a two years' course in the subject, as is required by the state board of optometry.

Ancestors Came from England in 1637. Dr. Darwin Rush Story, who has just died at his home in Proctorville, at the age of 91 years, has had an interesting and profitable life. He was born in Windsor, West Parish, Vt., on Aug. 17, 1819. He was descended from William Story, a native of Norwich, Eng., who settled in Chubbuck Parish, Essex, Mass., in 1637. Dr. Story's grandfather, Zachariah Story, was captain, was a native of Essex, who removed to Hopkinton, N. H., where Dr. Story's father, Dr. Dyer Story, was born in 1780. The family removed from Hopkinton, N. H., to West Windsor, Vt., in 1790.

Dr. Darwin Story studied medicine at the Berkshire Medical Institute at Pittsfield, Mass., and was graduated in the class of Dr. J. G. Holland. He began the practice of medicine with his father in West Windsor and continued there until 1854, when he removed to Proctorville, where he had since resided. He continued to practice medicine until about ten years ago, when he gave it up on account of failing health. He had held various town offices and in 1892 was in the New Hampshire legislature. Dr. Story was born in West Windsor, Vt., in 1819, to Eliza E. Story, who died in 1881, leaving one daughter, who has since died.

### LIBERATION NOTICE.

This is to give notice that I have given my son, Henry Platt, his time for the remainder of his minority, and that I shall settle none of his earnings nor pay any bills of his contracting on and after this date.

## IN LOCAL MARKETS

### Dressed Pork Shows Advances Today

### FRESH EGGS VERY FIRM

Dairy Butter Is Also Reported the Same.

Potatoes Are Plenty at 50 Cents

a Bushel—Other Quotations.

Barre, Vt., Sept. 21, 1910.

Dressed pork advances. Fresh eggs and dairy butter very firm. Wholesale quotations:

Dressed pork—Firm, 11c.

Veals—10½ to 11c.

Lamb—13 to 14c.

Poultry—16c.

Broilers—19 to 20c.

Fresh eggs—29 to 30c.

Butter—Creamery, 32 to 33c; dairy, 29 to 30c.

Potatoes—Plenty, 50c.

### RICKER'S MARKET REPORT.

Prices Practically Unchanged—Falling Off in Receipts.

St. Johnsbury, Sept. 21.—Receipts at W. A. Rickers' market for the past week were:

Poultry—3,000 pounds, 10c.

Lamb—900, 9 to 10c.

Hogs—210, 7½ to 8c.

Cattle—25, 26 to 27c.

Calves—215, 26 to 27c.

Milk cows—\$27 to \$30.

### IN BOSTON MARKETS.

Market Favors Buyers, Conditions Unsettled—Prices on Eggs Steady.

Boston, Sept. 21.—Receipts of butter are moderate in the local market, but weakness in other markets, as well as a very slow demand here, make it hard for dealers to maintain recent quotations. The market yesterday was unsettled, with some dealers asking former quotations and others willing to accept ½c a pound less than last week, and there was no little business that there was no established basis. In a general way, the market favors buyers, for although as high as 32c is asked for fancy northern creamery in tubs, it is offered by some receivers as low as 31½c, and for a buyer paying much more than 32c, since butter is at least a cent a pound cheaper in the country than it was a week ago, Canton, N. Y., this week quotes 29½c for extras against 30½c a week ago, and Elgin, Ill., in 30c for extras as compared with 30c last week. Primary creamery markets are firm, and the local market is steady in sympathy. Fancy, fresh western eggs are in demand and eastern stock are ample for wants, and prices are just steady.

Jobbing quotations:

Butter—Fancy northern creamery, tubs 31½ to 32½c; boxes 32½ to 33½c; prints 33 to 34½c; fancy western creamery, tubs 31½ to 32½c; ash tubs 31 to 32c; fair to good creamery 29 to 30c; dairy 28 to 29c.

Cheese—New York fancy 16½ to 17c; Vermont fancy 16½ to 17c; fair to good stock 14½ to 15c; Young Americans 18½ to 19c.

Eggs—Fancy henry 37 to 38c, choice eastern 35 to 36c, western 28 to 30c, storage 25 to 27c.

### The Park & Pollard & Co. DRY-MASH

Makes Them LAY OR BUST

The Park & Pollard Growing Eggs make your hens grow fast. Feed to them a month before marketing and they will lay more eggs and gain a pound each in weight. Your chickens should have it before them all the time. Sold by

Sargent & Harlow, East Barre.
